Seamless connectivity between 3Shape TRIOS® intraoral scanners and Straumann's esthetic dental solutions

- 3Shape TRIOS® fully integrated into Straumann's software for implant surgery planning, prosthetic design & milling, and other services (e.g. 'Smile in a Box').
- Smooth, integrated workflow makes it easy for dentists using TRIOS to submit scans and case information for ClearCorrect clear aligner treatment¹.

Basel/Copenhagen, 21 October 2020: Straumann and 3Shape are proud to announce the full integration of the 3Shape TRIOS intraoral scanning workflow with the Straumann Group's software solutions and services. This means that 3Shape's TRIOS intra-oral scanners can connect seamlessly with Straumann's orthodontic, restorative, implant, chairside, and digital dentistry solutions at the click of a button.

Intraoral scanning is a convenient modern alternative to unpleasant conventional methods of taking impressions of the patient's teeth. 3Shape's TRIOS® range of intraoral scanners is widely recognized as industry-leading technology, offering accurate, ultra-fast, powderless scanning in full-color, with digital shade measurement, an integrated intraoral camera and caries detection aid². The scanners are open for use with multiple systems but in combination with Straumann's broad digital ecosystem, which spans corrective, restorative and replacement dentistry, they become part of a uniquely powerful solution.

Most recently, the focus has been on orthodontics and developing a smooth, integrated workflow for TRIOS users to plan and order ClearCorrect clear aligners¹. The new application is now ready and is included in the latest software update that has just been released. ClearCorrect offers free education and support to help dentists provide clear-aligner treatment using digital impressions.

In the new TRIOS workflow, dentists simply select the ClearCorrect option and scan their patients. The scans together with case information are routed immediately and conveniently to ClearCorrect's Doctor Portal. The system also has convenient features enabling the dentist to show patients simulations of their teeth after aligner and whitening treatment.

In addition to the orthodontic solution, TRIOS is fully integrated into the following Straumann Group solutions:

- the CARES® CAD/CAM software for designing and milling prosthetics for tooth and implant-borne restorations,
- the coDiagnostiX® software for planning guided implant surgery, and
- centralized design services such as 'Smile in a Box', in which all implant and prosthetic components are conveniently delivered together, saving time and costs and adding to patient comfort.

¹ In markets where ClearCorrect is available

² In markets where caries detection indication is available

Guillaume Daniellot, CEO of the Straumann Group, commented: “Thanks to our continuing partnership with 3Shape we can offer dentists around the world one of the most advanced and user-friendly integrated intraoral scanning solutions without the hassle of ‘do-it-yourself’ connections and without the unpleasantness of conventional impression-taking. Our commitment to ongoing software development and support enables Straumann TRIOS users to keep their scanners up to date with the latest improvements and additions”.

Jakob Just-Bomholt, CEO of 3Shape said: “We are excited that dental professionals can now connect the 3Shape TRIOS intraoral scanner directly with Straumann software to offer seamless treatment workflows for Straumann’s clear aligners, restorative, implant, and chairside and digital dentistry solutions. This collaboration provides excellent treatment options with very smooth workflows for TRIOS users and makes TRIOS even more attractive to dentist on the lookout for an intraoral scanner.”

About 3Shape

3Shape is changing dentistry together with dental professionals across the world by developing innovations that provide superior dental care for patients. Our portfolio of 3D scanners and CAD/CAM software solutions for the dental industry includes the multiple award-winning 3Shape TRIOS intraoral scanner, the upcoming 3Shape X1 CBCT scanner, and market leading scanning and design software solutions for dental labs.

Two graduate students founded 3Shape in Denmark’s capital in the year 2000. Today, 3Shape has over 1,600 employees serving customers in over 100 countries from an ever-growing number of 3Shape offices around the world. 3Shape’s products and innovations continue to challenge traditional methods, enabling dental professionals to treat more patients more effectively.

About ClearCorrect

ClearCorrect, a Straumann Group brand, is a leading clear aligner manufacturer that has provided best-in-class support and quality, clinically driven products for doctors since 2006. Manufactured in Brazil, Germany and the US, its aligners are administered with doctor supervision, placing more power in the hands of those most qualified to develop safe and effective treatment plans customized to each patient’s specific needs. Today, ClearCorrect serves tens of thousands of trusted providers around the world.

About the Straumann Group

The Straumann Group (SIX: STMN) is a global leader in tooth replacement and orthodontic solutions that restore smiles and confidence. It unites global and international brands that stand for excellence, innovation and quality in replacement, corrective and digital dentistry, including Anthogyr, ClearCorrect, Dental Wings, Medentika, Neodent, Straumann and other fully/partly owned companies and partners. In collaboration with leading clinics, institutes and universities, the Group researches, develops, manufactures and supplies dental implants, instruments, CAD/CAM prosthetics, biomaterials and digital solutions for use in tooth replacement and restoration or to prevent tooth loss.

Headquartered in Basel, Switzerland, the Group currently employs more than 7200 people worldwide and its products, solutions and services are available in more than 100 countries through a broad network of distribution subsidiaries and partners.

Straumann Holding AG, Peter Merian-Weg 12, 4002 Basel, Switzerland.
